TOWNSHIP FILES ITS PRELIMINARY PLANS FOR SCHOOL

Seek Federal Aid for Six-Classroom Building At Newportville

ALL-PURPOSE ROOM

The Building, It is Expected, Will Cost About \$270,000

Walter Miller, regional superintendent, went to Harrisburg today, on behalf of the Bristol Township School Board to file preliminary school to be located in Newportmean that the Bristol Township School Board will qualify for the quarter-million dollar federal aid

for the construction of the school. The preliminary floor plans which were filed call for the erection of a school composed of six classrooms and one all-purpose room on the school board's present site which is composed of what was formerly the Swenson tracts between Newportville road and Hulmeville-Midway road, near New-

"The school board had filed similar plans early in 1951, but, "said Miller," the present application is being filed because of a change in the design of the rooms.

"The building will be contructed with the approximately \$270,000 made available under a grant for the government which allows aid in the construction of school facilities An inventory of raw materials to school boards in defense areas." The board, said Miller, has been

> working on getting the grant ever 1951. It is money the board feels

> and children from these units are

Miller explained that the school board had tried to get some of the money for use for the George Tavlor school but when they attempted they found it was too late to change the original application.

The school board, said Miller. would like to see the school go out No name as vet has been arrived

Iron ore for the Fairless Works at for the name of the school, according to Miller. Howell Lewis Shav is the architect.

AMBULANCE SERVICE The following were removed in

ambulances of Bucks County Rescue Squad yesterday: Mrs. Eisenbrey, 550 Bath street, returned from St. Farncis hospital, Trenton, N. J. yesterday morning; Mrs. Louise Schmidt, Andalusia, to Germantown hospital, yesterday afternoon; Clarence Murray, 40, of 1501 Princeton Trenton, N. J., with back injury, when he was struck by a wooden form used for pouring concrete. Murray was working at the bottom of an incline at Mill Creek Road and Fallsington road, when the form being carried by two fellow workers, slipped. It was to be used in preparing a foundation for a sewer.

TOWNSHIP FILES ITS PRELIMINARY

PLANS FOR SCHOOL Seek Federal Aid for Six-

Classroom Building At Newportville ALL-PURPOSE ROOM

The Building, It is Expected, Will Cost About \$270,000 Walter Miller, regional superintendent, went to Harrisburg today,

on behalf of the Bristol Township School Board to file preliminary school to be located in Newportville. Approval of the plans will mean that the Bristol Township School Board will qualify for the quarter-million dollar federal aid for the construction of the school. The preliminary floor plans

which were filed call for the erection of a school composed of six classrooms and one all-purpose room on the school board's present site which is composed of what was formerly the Swenson tracts between Newportville road and Hulmeville-Midway road, near Newportville.

"The school board had filed similar plans early in 1951, but, "said Miller," the present application is being filed because of a change in the design of the rooms. "The building will be contructed

with the approximately \$270,000 made available under a grant for the government which allows aid in the construction of school facilities to school boards in defense areas." The board, said Miller, has been working on getting the grant ever since they filed the previous set of scrap are now on the ground in the plans of the proposed school in 1951. It is money the board feels plant. These materials are arriving that the government owes it, beby rail at the Fairless Works at cause it has provided facilities for rates of 50 carloads of coal, 40 students from Bristol Terrace I.

> ed in 1942 and 1945. There are approximately 600 homes in the Terrace housing unit

Miller explained that the school board had tried to get some of the money for use for the George Taylor school but when they attempted to file application for allotment of some of the funds for this purpose

made available by that time. No name as yet has been arrived at for the name of the school, ac-

REPUBLICAN TICKET

FOR PRESIDENT Dwight D. Eisenhower FOR VICE-PRESIDENT Sen. Richard Nixon

FOR U. S. SENATOR Sen. Edward Martin FOR CONGRESS Hon. Karl C. King

FOR STATE SUPREME COURT Judge John S. Arnold

FOR STATE TREASURER Hon. Weldon B. Heyburn FOR AUDITOR GENERAL Hon. Charles R. Barber FOR STATE ASSEMBLY Hon. Wilson Yeakel Hon. Marvin V. Keller NEW SQUEEZE ON COAL?

A Swedish cook-stove burns oal and is built like a refrigerator. It makes wonderful use of the little bit of coal it burns. A few pounds a day go in. A small coopful of ashes come out. When the thing is not in use, the cooking rings are covered by big insulated lids that seem to put the whole stove to sleep, but eep it ready to awake at any me and start cooking again.

This seems to offer a clue as 10 what Dr. Everett Gorin is after. This researcher for a Pittsburgh coal company has taken out a patent for a process by which he claims he can produce, from a given weight of coal, more than twice as much electricity as steampowered generators can produce from it.

His process is based on a revolutionary idea. He burns coal to make steam. That far he follows the present system. But Dr. Gorin's steam turns no mechanical generator. It is used to heat more coal, making gas which is piped direct into something like a storage battery with cells and terminals. "The electrode in a cell yields oxygen to the gas and regains its oxygen from the adjacent electrode. The latter regains its oxygen from an air intake. Movement of the oxygen atoms produces electric current leading from the terminals."

The magazine Business Week says Dr. Gorin's firm is about to build him a pilot plant. It will surprise some people that a coal firm should be pushing an idea! that might result in great economy of coal. But more farseeing firms have always acted on the belief! they can ultimately profit from what is efficient.

If atomic discoveries result in lengthening life to 150 years, those who proclaimed "we owe it to ourselves" may be called upon to pay off the national debt.

Drought has seriously retarded crops in sections of New England, but so far no suggestion has come from the West that the area should be returned to grazing land.

Flight patterns of the flying saucers show no indication that they are being "controlled by a reasonable body," according to the Air Force. Russians, huh?

It is estimated \$10,000,000,000 is needed to modernize the nation's highways, but the same could have been said 40 years ago

REPUBLICAN TICKET

FOR PRESIDENT Dwight D. Eisenhower FOR VICE-PRESIDENT Sen. Richard Nixon FOR U. S. SENATOR Sen. Edward Martin

FOR CONGRESS Hon. Karl C. King FOR STATE SUPREME COURT Judge John S. Arnold

FOR STATE TREASURER Hon. Weldon B. Heyburn FOR AUDITOR GENERAL Hon. Charles R. Barber FOR STATE ASSEMBLY Hon. Wilson Yeakel Hon. Marvin V. Keller NEW SQUEEZE ON COAL?

A Swedish cook-stove burns coal and is built like a refrigerator. It makes wonderful use of the little bit of coal it burns. A few pounds a day go in. A small copful of ashes come out. When the thing is not in use, the cooking rings are covered by big insulated lids that seem to put the whole stove to sleep, but keep it ready to awake at any

• me and start cooking again. This seems to offer a clue as what Dr. Everett Gorin is after. This researcher for a Pittsburgh coal company has taken out a patent for a process by which he' claims he can produce, from a given weight of coal, more than twice as much electricity as steampowered generators can produce from it.

His process is based on a revolutionary idea. He burns coal to make steam. That far he follows the present system. But Dr. Gorin's steam turns no mechanical generator. It is used to heat more coal, making gas which is piped direct into something like a storage battery with cells and terminals. "The electrode in a cell yields oxygen to the gas and regains its oxygen from the adjacent electrode. The latter regains its oxygen from an air intake. Movement of the oxygen atoms produces electric current leading from the terminals."

The magazine Business Week says Dr. Gorin's firm is about to build him a pilot plant. It will surprise some people that a coal firm should be pushing an idea! that might result in great economy of coal. But more farseeing firms have always acted on the belief they can ultimately profit from what is efficient.

If atomic discoveries result in lengthening life to 150 years, those who proclaimed "we owe it to ourselves" may be called upon to pay off the national debt.

Drought has seriously retarded crops in sections of New England, but so far no suggestion has come from the West that the area should be returned to grazing land.

Flight patterns of the flying saucers show no indication that they are being "controlled by a reasonable body," according to the Air Force: Russians, huh?

It is estimated \$10,000,000,000 is needed to modernize the nation's highways, but the same could have been said 40 years ago

AS YOU know, it is impossible for a prospective buyer to accurately judge the relative merits of various cars through a casual examination or on the basis of claims.

Therefore, smart buyers are taking advantage of the record established in stock-car racing which affords an impartial test of the important features of competitive makes-features which largely determine owner satisfaction. In this rough, tough competition between cars just like you can buy from dealers, every make of car is compared for power, durability and safety-vital qualities in your daily driving.

With 30 victories in 34 starts already this year, Hudson proves it has these great qualities in measures no other car can match!

Hudson's rugged high-compression engines are famous for terrific power and performance. But more important, only Hudson has "step-down" design with America's lowest center of gravity. A Hudson hugs the road like it loves it and almost steers itself. Monobilt body-and-frame* is the most durable, safest known!

Visit us and try a Hudson, or if more convenient, phone and a Hudson will come to your door. *Trade-mark. Patents pending.

New Dual-Range Hydra-Matic Drive or Overdrive and Solex Safety Glass (tinted anti-glare) optional at extra cost on all models. Standard trim and other specifications and accessories subject to change without notice.

AS YOU know, it is impossible for a prospective buyer to accurately judge the relative merits of various cars through a casual examination or on the basis of claims.

Therefore, smart buyers are taking advantage of the record established in stock-car racing which affords an impartial test of the important features of competitive makes-features which largely determine owner satisfaction. In this rough, tough competition between cars just like you can buy from dealers, every make of car is compared for power, durability and safety-vital qualities in your daily driving.

With 30 victories in 34 starts already this year, Hudson proves it has these great qualities in measures no other car can match!

Hudson's rugged high-compression engines are famous for terrific power and performance. But more important, only Hudson has "step-down" design with America's lowest center of gravity. A Hudson hugs the road like it loves it and almost steers itself. Monobilt body-and-frame* is the most durable, safest known!

Visit us and try a Hudson, or if more convenient, phone and a Hudson will come to your door. *Trade-mark. Patents pending

Therefore, smart buyers are taking advantage of the record established in stock-car racing which affords an

or on the basis of claims.

impartial test of the important features of competitive makes-features which largely determine owner satisfaction. In this rough, tough competition between cars just like you can buy from dealers, every make of car is compared for power, durability and safety-vital qualities in your daily driving.

AS YOU know, it is impossible for a

prospective buyer to accurately judge the relative merits of various cars through a casual examination

With 30 victories in 34 starts already this year, Hudson proves it has these great qualities in measures no other car can match!

Hudson's rugged high-compression engines are famous for terrific power and performance. But more important, only Hudson has "step-down" design with America's lowest center of gravity. A Hudson hugs the road like it loves it and almost steers itself. Monobilt body-and-frame* is the most durable, safest known!

Visit us and try a Hudson, or if more convenient, phone and a Hudson will come to your door.

New Dual-Range Hydra-Matic Drive or Overdrive and Solex Safety Glass (tinted anti-glare) optional at extra cost on all models. Standard trim and other specifications and accessories subject to change without notice.

AS YOU know, it is impossible for a prospective buyer to accurately judge the relative merits of various cars through a casual examination or on the basis of claims.

Therefore, smart buyers are taking advantage of the record established in stock-car racing which affords an impartial test of the important features of competitive makes-features which largely determine owner satisfaction. In this rough, tough competition between cars just like you can buy from dealers, every make of car is compared for power, durability and safety-vital qualities in your daily driving.

With 30 victories in 34 starts already this year, Hudson proves it has these great qualities in measures no other car can match!

Hudson's rugged high-compression engines are famous for terrific power and performance. But more important, only Hudson has "step-down" design with America's lowest center of gravity. A Hudson hugs the road like it loves it and almost steers itself. Monobilt body-and-frame* is the most durable, safest known!

Visit us and try a Hudson, or if more convenient, phone and a Hudson will come to your door.

SPORTSMEN'S BRIEFS

By KEN JENKS (Pinch Hitting for Joe Elberson)

Sportsmen in any given community should feel extremely privileged when the facilities of membership to a Sportsmen Club are made available. There is no better way for hunters and fishermen to aid in the regulation and the safeguarding of their sport. Problems presented and debated on the floor of any local meeting may be approved and carried to the floor of County Federations through the medium of local representatives. In turn, approval by County groups would cause the issue to be forwarded to the State Federation, which in Pennsylvania today represents some 200,000 members sportsmen.

State Federations are in close contact with lawmaking bodies, Game and Fish Commissions at State Capitals. Delegates attend sessions of both Game and Fish Commissions and are permitted to offer issues which have been resolved. These resolutions aid the Commission greatly in fixing controls and many are adopted. This procedure has also been used to successfully amend or have repealed some laws which were proved detrimental to the best interest of sportsmen.

Local clubs usually have active programs of interest too for their members, such as trapshooting, rifles and pistol shooting, archery casting, etc. The cost of membership to these clubs is generally nominal sum and well worth every penny of it.

The Bristol Fish and Game Protective Association is a local club of this nature with a current membership of approximately 600 and the anual dues are \$1.00 Every sportsman should carefully consider membership to such an organization.

another annual pheasant raising program sponsored jointly by the Edgely and Bristol Clubs, was brought to a very successful termination last Saturday with the release of 218 birds.

In the latter part of May, 250 day old chicks were received from gin at two o'clock state Game Farms and placed in pens on the premises of Mr. and Mrs. George Bintliffe, Edgely, Pa. Under the fine handling of Mr. and Mrs. Bintliffe the loss of birds was held to the very low figure of 32. The Lukens, it balance were raised to grand healthy 3 month old birds, the usual age Geost, of

The birds which numbered 83 hens and 135 cocks were released on open shooting grounds in Falls, Bristol and Bensalem Townships; and, members of the Edgely and Bristol Clubs enjoy a sense of deep satisfaction in knowing they have contributed to and further enhanced the surrounding areas for the benefit of all hunters. We wish to also extend our sincere appreciation to Mr. and Mrs. Bintliffe for having given of their time and effort which we feel is the big reason this program is made possible.

For the past three of four years the quantity of Ruffed Grouse has held at such a high level, despite very heavy annual harvest, that this fall the open season for this fine bird will be the longest hunters have enjoyed for many years. The season will open with all small or upland game November 1st and continue through the entire month upland game November 1st and continue through the entire month Croft, rf and close November 29th. Happy days for the shotgun hunter who Walker p likes to tramp the wooded slopes during the beautiful autumn.

Anyone wishing to observe fishing from the surf by fishermen highly skilled in this popular sport may do so at Long Beach Island, N. J., the first Saturday and Sunday of September, which are the dates of the 6th and 7th. During these two days theLong Branch Island Fishing Club will hold its annual invitation Inter-Club Surf Fishing tournament. The Bristol Club will have a six man team in competition. Fishing time will be from 11:00 A. M. to 3:00 P. M. on Saturday and from 9:00 A. M. to 1:00 P. M. Sunday. Goodluck to our boys and may the surf be plenti-

SPORTSMEN'S BRIEFS

By KEN JENKS (Pinch Hitting for Joe Elberson)

Sportsmen in any given community should feel extremely privileged hen the facilities of membership to a Sportsmen Club are made avail-There is no better way for hunters and fishermen to aid in the sociation and the safeguarding of their sport. Problems presented and contact on the floor of any local meeting may be approved and carried to the floor of County Federations through the medium of local representatives. In turn, approval by County groups would cause the issue to be forwarded to the State Federation, which in Pennsylvania today presents some 200,000 members sportsmen.

State Federations are in close contact with lawmaking bodies, Game and Fish Commissions at State Capitals. Delegates attend sessions of both Game and Fish Commissions and are permitted to offer issues which have been resolved. These resolutions aid the Commission greatly in fixing controls and many are adopted. This procedure has also been used to successfully amend or have repealed some laws which were

proved detrimental to the best interest of sportsmen. Local clubs usually have active programs of interest too for their mbers, such as trapshooting, rifles and pistol shooting, archery, iting, etc. The cost of membership to these clubs is generally a minal sum and well worth every penny of it.

The Bristol Fish and Game Protective Association is a local club of this nature with a current membership of approximately 600 and the anual dues are \$1.00 Every sportsman should carefully consider

membership to such an organization.

Another annual pheasant raising program sponsored jointly by the Edgely and Bristol Clubs, was brought to a very successful termination last Saturday with the release of 218 birds.

In the latter part of May, 250 day old chicks were received from state Game Farms and placed in pens on the premises of Mr. and Mrs. George Bintliffe, Edgely, Pa. Under the fine handling of Mr. and Mrs. Bintliffe the loss of birds was held to the very low figure of 32. The Chance were raised to grand healthy 3 month old birds, the usual age for liberation.

The birds which numbered 83 hens and 185 cocks were released

on open shooting grounds in Falls, Bristol and Bensalem Townships; and, members of the Edgely and Bristol Clubs enjoy a sense of deep ontisfaction in knowing they have contributed to and further enhanced the surrounding areas for the benefit of all hunters. We wish to also extend our sincere appreciation to Mr. and Mrs. Bintliffe for having given of their time and effort which we feel is the big reason this prom is made possible. For the past three of four years the quantity of Ruffed Grouse have enjoyed for many years. The season will open with all small or

nd game November 1st and continue through the entire month pland game November 1st and continue through the entire month Croft, of close November 29th. Happy days for the shotgun hunter who Walker, places to tramp the wooded slopes during the beautiful autumn. Ites to tramp the wooded slopes during the beautiful autumn.

Anyone wishing to observe fishing from the surf by fishermen highly skilled in this popular sport may do so at Long Beach Island, N. J., the first Saturday and Sunday of September, which are the dates of the 6th and 7th. During these two days the Long Branch Island Fishing Club will hold its annual invitation Inter-Club Surf Fishing tournament. The Bristol Club will have a six man team in competition. Fishing time will be from 11:00 A. M. to 3:00 P. M. on Saturday and from 9:00 A. M. to 1:00 P. M. Sunday. Goodluck to our boys and may the surf be plenti-
